

STAYING CLEAN

STAYING SAFE

WHAT WE'RE DOING TO PREVENT THE SPREAD OF COVID-19

We've created the following cleaning check-list for our team members based on guidelines from the Centers for Disease Control and Prevention (CDC).

DID YOU KNOW?

- *We have had formal trainings with all of our team members about proper cleaning protocol.*
- *All of our supplies are EPA approved. We also check for expiration dates frequently!*
- *The safety of our team is just as important to us! They are required to wear a mask, properly dispose of gloves, wash their hands or use hand sanitizer, and ventilate rooms while cleaning.*

WHAT WE'RE CLEANING IN CABINS & LODGES

- Replacing all complimentary items after each check-out.**
Soaps, coffee filters, dish sponge, etc. are replaced after each guest leaves. Soap containers are disinfected, filled, and replaced.
- Sofas/covers and other porous surfaces.**
We remove any visible dirt or grime, then use use an appropriate cleaner for the material. When needed, we machine-wash items at the highest heat possible.
- Washing all linens at the highest heat setting.**
That includes bed sheets, hand and bath towels, and kitchen towels. Mattress covers are sprayed with disinfectant.
- Focusing on frequently touched surfaces.**
Light switches, doorknobs, remote controls, faucet handles, etc. *(See full list on next page)*

CLEANING CHECK-LIST: CABINS & LODGES

We pay special attention to these frequently touched surfaces!
